

OHSEL Board March 2019

Agenda Item Programme Director's Report
Lead Director Julie Lowe
Report Author Julie Lowe
Action required For discussion
Date report submitted 18 March 2019

1. Summary

This report provides an update on activity since the January OHSEL Board. The focus of work is now our response to the Long Term Plan and the development of our Integrated Care System.

2. Programme Highlight reports

PMO highlight reports for Month 11 (February 2019) are attached. An initial refresh of our risk and issues log has been completed. Our programmes are all being reviewed in the light of the long term plan and will be presented in future months grouped in our overarching theme areas of Community Based Care, Acute Based Care, Mental Health and Enabler programmes.

3. Areas of Development and Focus

We are continuing to work on the 'system architecture' that will support the implementation of the Long Term Plan, in particular Primary Care Networks, and our place/ borough based systems. We are updating our 'population- based health' narrative to explain better how working in this way improves outcomes and experience for our patients. This is underpinned by our system improvement plan detailing short- term actions to ensure we meet the criteria to develop our Integrated Care Systems further.

The Pharmacy systems leadership group ran a successful day in March sharing their learning with pharmacy colleagues across London. Key findings so far is that there is much work that can be done to improve medicines use- this can both improve outcomes for patients and reduce spending. There is also work to be done to enable pharmacists to work across sector (community, practice based, CCG and hospital) to reduce duplication and again improve outcomes for patients.

I am delighted to report that we have appointed Ian Riley as Chief Information Officer (CIO). Ian joins us from North West London on 1 May 2019.

4. Recommendation

The OHSEL Board is asked to note this report

Julie Lowe

STP Programme Director
