STP Programme Update

Summary

This paper summarises progress since the last meeting of the SPG.

Programme Highlight reports

The programme highlight reports for April for our Clinical, Enabler and productivity programmes accompany this paper (paper B2).

Key areas of focus

Over the last few months we have been refreshing the programme priorities and agreeing areas of focus for 2018/19. These are the subject of a separate paper at this meeting.

A narrative covering key areas of progress was developed as the OHSEL March/April update. This is circulated to stakeholders regularly and accompanies this paper for information (paper B3).

Areas of development

The STP continues to undertake work to look at more strategic options for integrated care. At the moment most of the focus is on borough based local systems, enabling the integration of aspects of health and social care together with the further development of primary care at scale.

Work continues on the interface between specialist and local services and there are specific programmes of work with NHS England colleagues on cardiac, renal and specialist children's pathways. In mental health some specialist commissioning functions have now been delegated to the South London Partnership (SLP). Discussions are ongoing about whether further delegation of specialist commissioning budgets would be beneficial.

Working with the SE alliance (the 6 CCGs' at scale functions) presents new opportunities for collaborative working and we have been developing an Acute Based Care (ABC) programme which will bring together some of the Clinical Leadership Groups' work with a focus on demand and capacity modelling. This will in turn help inform aspects of our estates strategy so that we are able to ensure we have the infrastructure in place to meet the future care needs of local people.

Recommendation

The SPG is asked to note this update.
